Comparison of viral production calculation

Population: c_Viruses; Calculation method: all linear regression variants

Kruskal-Wallis Test: Linear Methods Mean

$$\chi^{2}_{\text{Kruskal-Wallis}}(4) = 2.38e - 03, p = 1.00, \hat{\varepsilon}^{2}_{\text{ordinal}} = 1.59e - 05, \text{CI}_{95\%} [4.85e - 03, 1.00], n_{\text{obs}} = 150$$

Kruskal-Wallis Test: Linear Methods SE

$$\chi^2_{Kruskal-Wallis}(4) = 1.80, \, p = 0.77, \, \hat{\epsilon}^2_{ordinal} = 0.01, \, CI_{95\%} \, [7.70e-03, \, 1.00], \, n_{obs} = 132$$
