# Comparison of viral production calculation

Population: c_Viruses; Calculation method: all linear regression variants

Kruskal–Wallis Test: Linear Methods Mean

$\chi^2_{Kruskal-Wallis}(4) = 2.38\text{e-}03$, $p = 1.00$, $\hat{\epsilon}^2_{ordinal} = 1.59\text{e-}05$, $CI_{95\%}$ [5.36e-03, 1.00], $n_{obs} = 150$

Kruskal–Wallis Test: Linear Methods SE

$\chi^2_{Kruskal-Wallis}(4) = 1.80$, $p = 0.77$, $\hat{\epsilon}^2_{ordinal} = 0.01$, $CI_{95\%}$ [6.41e-03, 1.00], $n_{obs} = 132$
